DETAILED ACTION

Response to Amendment

The amendment filed on June 4, 2007 is sufficient to overcome the prior art reference and place the application in condition for allowance.

Allowable Subject Matter

Claims 1-5 and 9-19 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art, does not disclose or fairly suggest *wherein each of the jaws fixed relative to the common pivot axis are fixed at a different angle* in combination with the rest of the claimed limitations as set forth in claim 1.

The prior art, Alexandersson does not disclose or fairly suggest *wherein each of the jaws fixed relative to the common pivot axis are fixed at a different angle*. Because Applicant has clearly stated criticality to fixing the jaws at a different angle relative to a common pivot axis to ensure that adjacent jaws close consecutively with respect to one another this feature of fixing the jaws at differing angles is therefore not obvious to the skilled Artisan.

Prior art, Wack (5,183,216) teaches in a similar art, a cutting implement having a plural of pairs of jaws, wherein the jaws have different heights (fig. 3) to efficiently cut/crush an implement. Although Wack teaches differing heights, Wack does not teach the *jaws being fixed at a different angle relative to a common pivot axis* and instead teaches the jaws fixed at the same angle relative to a common pivot axis. Accordingly, neither Alexandersson alone nor in

combination with Wack anticipates nor render obvious the claimed invention as set forth in claim

1.

Neither the prior art of record nor any combination thereof discloses the claimed invention as set forth in claim 1. Therefore claims 1-5 and 9-19 are deemed allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
